SOFTWARE SKILLS:

Python

C / C++ / C#

Unity

SQL

GIT

Power BI

Tableau

Streamlit

Spark

EDUCATION:

Bachelor of Systems Analysis

LANGUAGES:

Spanish (Native)

English (Upper-Intermediate)

CERTIFICATIONS:

Data Analyst

Machine Learning

Neural Network

LINKEDIN PROFILE:

SUMMARY

- Bachelor of Systems Analysis (Licenciatura en Analisis de Sistemas) - faculty of Engineering - University of Buenos Aires. Argentina (FI-UBA).
- Experienced Data Analyst and Software Developer with a demonstrated history of working in the information technology and banking/financial services industry.
- Professional skills in Python, SQL, Unity, and C/C++/C# programming languages.
- Experience with interactive visualization libraries like Matplotlib, Plotly, Altair, Seaborn, Bokeh.
- Knowledge advanced techniques for Data Cleaning, Data Wrangling and Feature Engineering.
- Development interactive web app for Data Analysis, Machine Learning and Data Science using frameworks like Streamlit or Flask. Experience with Jupiter notebook and Spark
- Building dashboards in Tableau and Power BI .
- Experience developing ML model using Python, Panda, Numpy, Scikit-Learn, TensorFlow, Keras and other related technologies.
- Implementation of ML: Logistic/Linear Regression, KNN, K-Means Clustering, Random Forest/Decision Trees, Neural Networks, SVM, NLP among others.

WORK EXPERIENCE

Red Link S.A. (Banking/Financial) Argentina

■ Senior Data Analyst / Software Developer (May 2008 - Present)

Design, develop and pushed into production debit/credit card and ecommerce applications.

Real-time transaction monitoring. Modeling Data Dictionary. Develop frameworks for data analysis and ML.

Methodologies used: Waterfall, Agile, Scrum, and Kanban.

Estudio Moor (Accounting) Argentina

■ External consultant in Data Analyst / Machine Learning (Apr 2020 - Present)

Data cleaning and wrangling with Python. Exploratory Data Analysis. Time series and features prediction.

Develop Machine Learning models. Clustering to obtain business insights. PostgreSQL DB.

Analyze Big Data: Hadoop (HDFS) and MapReduce. Spark, RDD, Pyspark and AWS EC2.

BlackPuma Development Studio (Gaming/Entertainment) Argentina

■ Company Owner (Jan 2014 - Apr 2020)

App/Game design and develop using Unity, C# and Python. Implementation of ML Agents in Unity

Users statistical analysis and report generation. Time Series forecasting. NLP for Spam Filters.

Citibank Argentina (Banking/Financial) Argentina

■ Analyst and Developer (Sep 2005 – May 2008)

Financial Application Development using Python and C++ for instruments and Bonds operations.

Data pipelines. ETL. Generation of interactive dashboards for management.
